DECLASS REVIEW BY NIMA / DoD

PROBABLE CRUISE-MISSILE LAUNCH SITE

NEAR NAKHODKA, USSR

25X1D

Continuing analysis of KEYHOLE Missions [REDACTED] has revealed a probable cruise-missile launch site at 42-40-45N 133-03-00E, 11 nautical miles (nm) southeast of Nakhodka, USSR. The site appears complete and consists of 2 launch revetments oriented southwest, 2 probable electronics positions, and 5 additional revetments, at least one of which is probably a missile-hold revetment. This site is similar to that identified at Port Arthur, China. This site was first observed on Mission [REDACTED] but could not be identified as a cruise-missile site at that time.
